

To Compile & Run Program 1:

1. Download Java.7z from <http://mboshart.dyndns.org/~mboshart/2310Labs/Lab01.html> and unzip it to the top of your C drive (i.e. C:\Java)
2. Download build.bat, build.xml, and pizza_input_0.txt to your Program 1 working directory, mine looks like the following:

 .git	3/11/2019 6:12 PM	File folder	
 build	3/11/2019 7:56 PM	File folder	
 images	3/11/2019 6:12 PM	File folder	
 src	3/11/2019 6:12 PM	File folder	
 build.bat	3/11/2019 6:17 PM	Windows Batch File	1 KB
 build.xml	10/12/2017 8:37 PM	XML Document	2 KB
 pizza_input_0.txt	10/13/2017 12:24 ...	Text Document	1 KB

3. To Compile & Run, type: **build c** at the command line
 - a. To enter in user input manually, simply delete ‘< **pizza_input_0.txt**’ from the last line of the batch file (note: sometimes ant seems to not show what you are typing as input, however, it should still accept it)
4. Download the output PNG files to view my output using this build file
